				Est. 1225 Dry Tons	Unit cost Avg. Per Dry Ton	\$690.00						
				Est. 1225 Dry Tons	Est. Project totals Avg. Per Dry Ton	\$684.80						

The City is requesting bidders provide bids in form of Unit Cost Per Dry Ton of Biosolids removed and disposed of from the facility. It is the City's intent to enter into a Not to Exceed contract for the full amount that the City has budgeted for this project. The project will be deemed complete when one of the following events occurs:

1. All Biosolids have been removed from the Waste Lagoons.
2. The budget for the project has been exhausted.
3. The contract deadline of December 31, 2024 has been reached, unless the contract completion date has been extended by mutual written agreement of both parties.

The City anticipates that this project should be completed in one (1) Mobilization and Demobilization. If the Bidder is proposing more than one (1) Mobilization and Demobilization please provide the anticipated number in the Quantities column above.

All bidders shall provided a Project Narrative with their bids for the City's review and approval. The Project Narrative shall include the anticipated start date for the project and proposed methods for removal, transport and disposal of the Biosolids.
